BUSINESS RELATED RISKS

1. ***Our expansion into new product categories and an increase in the number of products offered by us may expose us to new challenges and more risks.***

Our Company is engaged in the business of manufacturing of precision stainless steel cold rolled strips, offering a wide range of thin and ultra-thin variants designed to meet diverse industrial requirements. The company's products are widely used across various sectors including the textile, automotive, chemical industries, as well as in flexible tubes, capillary tubes, clocks, watches, and electrical equipment. We intend to expand our business operations, by undertaking investment to expand production capabilities and improve product offering. In line with this objective, the Company has finalized a deal to import and install an 1150 mm 4-Hi AGC Reversible Rolling Machine from China, and the same is proposed to be set-up at the existing manufacturing unit of the Company. For further details, please see the chapter titled "Objects of the Issue" on page 83. The introduction of new product line with the installation of new 1150 mm 4-Hi AGC Reversible Rolling Machine will enable the Company to cater additional industry segments. We introduction of new products may expose us to new challenges which may in turn also impact our product mix and revenues in future. Therefore, our past results of operations should not be taken as indicative of our future performance. If we cannot successfully manage our product mix, address new challenges or compete effectively, we may not be able to recover costs of our investments and eventually achieve profitability, and our future results of operations and growth prospects may be materially and adversely affected.

2. ***We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.***

Our Company is engaged in the business of manufacturing of precision stainless steel cold rolled strips, offering a wide range of thin and ultra-thin variants designed to meet diverse industrial requirements. The company's products are widely used across various sectors including the textile, automotive, chemical industries, as well as in flexible tubes, capillary tubes, clocks, watches, and electrical equipment. The contribution of our top ten, top five and top three customers in our total revenue are as under:

(Amount. in lakhs)

Particulars	FY 2025	% of Total Sales	FY 2024	% of Total Sales	FY 2023	% of Total Sales
Top 10	12,030.06	82.52%	10,277.44	78.83%	10,318.75	76.41%
Top 5	9,945.46	68.22%	8,364.29	64.16%	9,257.17	68.55%
Top 3	7,921.78	54.34%	7,103.20	54.48%	8,414.28	62.31%

*Revenue from Operations is INR 14,579.11 Lakhs in FY 24-25.

*Revenue from Operations is INR 13,037.44 Lakhs in FY 23-24.

*Revenue from Operations is INR 13,503.95 Lakhs in FY 22-23.

While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, if there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

3. ***Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.***

We have experienced negative cash flows in the past which have been set out below:

(Amount. in lakhs)

Particulars	For the Financial Years ended March 31,		
	2025	2024	2023
Net cash (used in)/ Generated from operating activities	(495.18)	386.24	29.91
Net cash (used in)/ Generated from investing activities	379.20	(150.62)	(114.25)
Net cash (used in)/ Generated from finance activities	(1070.63)	957.54	84.83

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. Such negative cash flows lead to a net decrease in cash and cash equivalents. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, please refer “Restated Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 174 and 206, respectively.

4. ***We highly depend on our raw materials and a few key suppliers who help us procure the same. In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.***

Our Company is engaged in the business of manufacturing of precision stainless steel cold rolled strips, offering a wide range of thin and ultra-thin variants designed to meet diverse industrial requirements. The company’s products are widely used across various sectors including the textile, automotive, chemical industries, as well as in flexible tubes, capillary tubes, clocks, watches, and electrical equipment. We are dependent on third party suppliers for procuring the aforementioned raw materials used in the manufacture of our products. The purchases from our top ten, top five and top three suppliers are as under:

(Amount in Lakhs)

Particulars	FY 2025	% of Total Purchases	FY 2024	% of Total Purchases	FY 2023	% of Total Purchases
Top 10	13,352.58	93.69%	10,106.37	99.21%	10,566.38	86.54%
Top 5	11,465.76	80.45%	9,932.27	97.50%	9,436.04	77.29%
Top 3	9,155.34	64.24%	9,674.08	94.96%	7,662.85	62.76%

*The Total Purchases during FY 24-25 is Rs. 14,251.27 Lakhs

*The Total Purchases during FY 23-24 is Rs. 10,187.06 Lakhs.

*The Total Purchases during FY 22-23 is Rs. 12,209.23 Lakhs

Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. We have not entered into formal arrangements or contracts with third-party suppliers from whom we procure our raw materials. We rely on pre-booking capacity with our suppliers, based on our demand projections. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Further, the amount of raw materials procured and the price at which we procure such materials, may fluctuate from time to time. In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, environmental factors and changes in government policies and regulations, including those relating to the steel industry in general. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

5. ***The commercial success of our products depends to a large extent on the success of the products of our end use customers. If the demand for the end use products in which our products are used as a raw materials declines, it could have a material adverse effect on our business, financial condition and results of operations.***

Our Company is engaged in the business of manufacturing of precision stainless steel cold rolled strips, offering a wide range of thin and ultra-thin variants designed to meet diverse industrial requirements. The company’s products are widely used across various sectors including the textile, automotive, chemical industries, as well as in flexible tubes, capillary

tubes, clocks, watches, and electrical equipment. Our customers are mainly manufacturers functioning in the diverse industries. For further details, please refer to the chapter titled “*Our Business*” at page 126 of this Draft Prospectus.

The demand of our products is directly proportional to the demand of the products of our customers who use our products to market their products and services. Therefore, the commercial success of our business is highly dependent on the commercial viability, demand and success of the end use products of our customers. Any downturn in the demand of such products could have a direct impact on the demand of our products and our business operations. Any disturbance in the industry in which our customers supply their end use products could adversely impact our business due to our high dependence on our customers. A reduction in the demand, development and production activities in the industries in which the end use products of our customers are supplied to, may correspondingly cause a decline in the demand for our products due to a slump in the business activities of our customers. Alternatively, in the event our customers devise another cost effective method to market and sell their products or if our customers are able to find a cheaper alternative for our products, it could conversely result in a reduction in the demand of our products and have a material adverse effect on our business, financial condition and results of operations.

We cannot assure you that we will be develop and innovate diverse applications of our products in various industries to diversify and bifurcate our business risk in a systematic manner and counter effect the failure of one industry to avoid an impact on our business operations. We also cannot assure you that we will be able to provide cost effective and quality products to our customers, which would deter them from approaching our competitors to substitute our products at lower prices. Our failure to effectively react to these situations or to successfully introduce new products or new applications for our existing products could adversely affect our business, prospects, results of operations and financial condition.

6. *Under-utilization of our manufacturing capacities may have an adverse effect on our business, future prospects and future financial performance.*

The success of any capacity investment and expected return on investment on capital expenditure is subject to, among other factors, the ability to procure requisite regulatory approvals in a timely manner; recruit and ensure satisfactory performance of personnel to further grow our business; and the ability to absorb additional infrastructure costs and develop new expertise. Our ability to maintain our profitability depends on our ability to optimize the product mix to support high-margin products and products with consistent long-term demand and the demand and supply balance of our products in the principal and target markets. In particular, the level of our capacity utilization can impact our operating results. Capacity utilization is also affected by our product mix and the demand and supply balance. The break-up of the capacity utilization in our manufacturing unit for the period indicated has been provided below:

Particulars	Product	Fiscal 2025	Fiscal 2024	Fiscal 2023
Capacity (Units)	SS CR Coil circle	14000 M.T	14000 M.T	14000 M.T
Utilization (Units)		7987.54 M.T	7244.32 M.T	7538.85 M.T
Percentage of Utilization		57.05%	51.74%	53.85%
Total working Days		303	304	303

For further information, see “*Our Business*” on page 126 of this Draft Prospectus.

These capacity utilization details are not indicative of future capacity utilization rates, which are dependent on various factors, including demand for our products, availability of raw materials, our ability to manage our inventory and improve operational efficiency. Further, the Company has finalized a deal to import and install 1150 mm 4-Hi AGC Reversible Rolling Machine from China. This installation is expected to significantly enhance the Company’s capacity utilization, increasing production capacity by 2.5 times compared to the current level.

Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance. Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at our manufacturing facilities, the availability of raw materials, industry/ market conditions, as well as by the product requirements of, and procurement practice followed by us. In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facilities, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition.

7. *We do not own the premises where Manufacturing Facility of our Company is situated. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our operations and,*

consequently, our business.

As on the date of this Draft Prospectus, our premises where our Manufacturing Facility is situated is taken on lease by our Company from Rajasthan State Industrial Development & Investment Corporation Limited. The details of our lease agreements have been provided below:

Purpose	Address of Premises	Owned/Leased	Name of the Seller/Lessor	Date of Execution of Agreement	Consideration (including Stamp Duties)/ Lease Amount	Area
Manufacturing Facility**	C-40-C, SKS Industrial Area, Reengus, Sikar, Rajasthan, 332404	Leased	Rajasthan State Industrial Development & Investment Corporation Limited	October 15, 2015 Lease Term: 99 years from April 01, 2000	Rs. 456/- per annum	6075.60 Sq Mtr.

For details, please refer to the chapter titled “*Our Business- Land and Property*” on chapter beginning on page 126 of this Draft Prospectus.

There can also be no assurance that our Company will be able to renew the lease agreements or deeds entered into with third parties in a timely manner or at all. Further, there can be no assurance that we will not face any disruption of our rights as a lessee/ licensee and that such leave and license and lease agreements will not be terminated prematurely by the licensor/lessor. Any such non-renewal or early termination or any disruption of our rights as lessee / licensee will adversely affect our business operations.

8. *Our group companies had losses in the past years, details of which are given below.*

We are one of group company Krypton Stainless Private Limited has incurred losses in the past which have been set out below:

Particulars		(Rs. in lakhs)
		2023
Profit after Tax		(1.54)

For details in respect of the group company, please refer to the chapter titled “*Our Group Companies*” on page 230 .

Any operating losses/negative net worth could adversely affect the overall operations of the group and financial conditions and also divert the attention of the management towards these companies which could have an adverse effect on our operations and financials. There can be no assurance that our group companies will not incur losses in any future periods, or that there may not be an adverse effect on our reputation or business as a result of such losses.

9. *We cannot assure you that the proposed upgradation at the existing manufacturing unit of our Company which is proposed to be funded from the Net Proceeds will become operational as scheduled, or at all, or operate as efficiently as planned. If we are unable to commission the upgradation of existing manufacturing unit in a timely manner or without cost overruns, it may adversely affect our business, results of operations and financial condition.*

Our Company, the Company has finalized a deal to import and install 1150 mm 4-Hi AGC Reversible Rolling Machine from China. An advance payment of ₹198.72 lakhs has already been made toward the procurement of this state-of-the-art machinery. This installation is expected to significantly enhance the Company’s capacity utilization, increasing production capacity by 2.5 times compared to the current level. We propose to utilise an amount of ₹ 1,378.17 lakhs out of the Net Proceeds towards investment in our Subsidiary for financing its capital expenditure requirements in relation to the setting up of the new 1150 mm 4-Hi AGC Reversible Rolling Machine. For further details, please see “*Objects of the Issue*” on page 83 .

Our upgradation plan may be subject to delays and other risks, among other things, unforeseen engineering or technical problems, disputes with workers, force majeure events, unanticipated cost increases or changes in scope and delays in obtaining certain property rights and government approvals and consents. Additionally, we may face risks in commissioning the proposed upgradation including but not limited to, delays in construction, problems with its facilities or for other reasons, if our Proposed Facility does not function as efficiently as intended, or utilisation of the proposed

upgradation is not optimal, we may not be able to take additional orders to produce anticipated or desired revenue as planned any of which could result in delays, cost overruns or the termination of the project.

In the event of any delay in the schedule of implementation or if we are unable to complete the project as per the scheduled time, it could lead to revenue loss for our Company. If the proposed upgradation is not commissioned at the scheduled time, our Company may face cash crunch. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. As a result our business, financial condition, results of operations and prospects could be materially and adversely affected.

10. Our continued operations are critical to our business and any shutdown of our manufacturing unit may adversely affect our business, results of operations and financial condition.

Our manufacturing unit is situated at C-40-C, SKS Industrial Area, Reengus, Sikar, Rajasthan, 332404. We propose to utilise an amount of ₹ 1,378.17 lakhs towards funding the capital expenditure at the said manufacturing unit. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our current operations and proposed upgradation of the manufacturing unit are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our other results of operations and our financial condition as a whole. Spiraling cost of living around our units may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness.

11. Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could adversely affect our business, results of operations and financial condition.

We have experienced considerable growth over the past three years and we have expanded our operations and product portfolio. We cannot assure you that our growth strategies will continue to be successful or that we will be able to continue to expand further, or at the same rate. Our inability to execute our growth strategies in a timely manner or within budget estimates or our inability to meet the expectations of our customers and other stakeholders, could have an adverse effect on our business, results of operations and financial condition. Our future prospects will depend on our ability to grow our business and operations. The development of such future business could be affected by many factors, including general, political and economic conditions in India, government policies or strategies in respect of specific industries, prevailing interest rates and price of equipment and raw materials. Further, in order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our customers' needs, hire and retain new employees or operate our business effectively. Failure to manage growth effectively could adversely affect our business and results of operations.

12. We generate our major portion of sales from our operations in certain geographical regions. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.

We generate major sales from our customers situated at select geographical regions. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. The table sets forth below revenue earned by our Company by offering services in various states as a percentage of our revenue from operations during the period indicated:

Existing and potential competitors to our businesses in these states may increase their focus on these states. The concentration of our operations heightens our exposure to adverse developments related to competition, as well as economic, political, demographic and other changes, which may adversely affect our business prospects, financial conditions and results of operations. While we strive to geographically diversify our product portfolio and reduce our concentration risk, we cannot assure you that adverse developments associated with the region will not impact on our

business. If we are unable to mitigate the concentration risk, we may not be able to develop our business as planned and our business, financial condition and results of operation could be adversely affected.

This concentration of business subjects us to various risks, including but not limited to:

- (i) vulnerability to change in laws, policies and regulations of the political and economic environment;
- (ii) perception by our potential customers that we are a regional company which hampers us from competing for large and complex projects at the national level; and
- (iii) limitation on our ability to implement the strategy to cluster projects in the states where we intend to conduct business.

Further, any significant interruption to our operations directly or indirectly as a result of any severe weather or other natural disasters could materially and severely affect our business, financial condition and results of operations. Similar adverse consequences could follow if war, or war-like situation were to prevail or terrorist attacks, *etc.* In such instance, we may have to completely halt our operations which may severely impact our business operations. Any such disruption for any reason could result in significant increase of costs and delays in execution of orders.

Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside our present geographical regions may adversely affect our business prospects, financial conditions and results of operations. While our management believes that our Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance. While such instances have not materially occurred in the past, however future occurrence of any such instances could impact our earnings, financial condition and results of operation.

13. There are outstanding litigations involving our Company which, if determined adversely, may adversely affect our business and financial condition.

As on the date of this Draft Prospectus, our Company is involved in certain legal proceedings. We cannot assure you that these legal proceedings will be decided in favour of our Company or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

14. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers’ expectations.

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control and quality assurance processes and regularly conduct inspections of raw materials sourced from suppliers which is based on our internal quality standards and the quality standards set by our customers. We are accredited with ISO 9001: 2015, ISI certification 15997:2012 Low Nickel Austenitic Stainless-Steel Sheet and Strip for Utensils and Kitchen Appliances, IS 5522:2014 Stainless Steel Sheets and Strips for Utensils and IS 6911:2017 Stainless Steel Plate, Sheet and Strip. However, we cannot assure you that our quality control and quality assurance processes will not fail or the quality tests and inspections conducted by us will be accurate at all times. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality assurance procedures, negligence, human error or otherwise, may damage our products and result in deficient products. It is conducive for us to meet the international quality standards set by our international customers as deviation from the same can cause them to reject our products and can also cause damage to our reputation and market standing.

In the event the quality of our products is not in accordance with our standards or our products are defective, our customers may return our products and our reputation may suffer impact, which in turn may adversely affect our business, results of operations and financial condition. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

15. Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.

Our business requires a significant amount of working capital. In the event, we are unable to source the required amount of working capital for addressing an increased demand of our services, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our services.

Further, one of the objects of this Issue include funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “*Objects of the Issue*” on page 83 . Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments on the services, on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows,

including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

16. Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we generally supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

17. Our Company has applied for registration of certain trademarks in its name. Until such registrations are granted, our Company may not be able to prevent unauthorised use of such trademarks by third parties, which may lead to the dilution of our goodwill.

Our Company has applied for registration of the following trademarks:

Date of Application	Trademark	Application No.	Class	Current Status
December 27, 2024	Shri Kanha Stainless Ltd- Device	6777417	6	Application Under Process
December 27, 2024	Shri Kanha Stainless Ltd- Word	6777418	6	Application Under Process

Pending the registration of these trademarks, any other vendor in the similar line of business as ours may use the above-mentioned trademarks and we may have a lesser recourse to initiate legal proceedings to protect our intellectual property. Further, our applications for the registration of certain trademarks may be opposed by third parties, and we may have to incur significant cost in relation to these oppositions. In the event we are not able to obtain registrations due to opposition by third parties or if any injunctive or other adverse order is issued against us in respect of any of our trademarks for which we have applied for registration, we may not be able to use such trademarks and / or avail the legal protection or prevent unauthorized use of such trademarks by third parties, which may adversely affect our goodwill and business. For further details on the trademarks, registered or pending registration, please refer to the chapters titled "Our Business" and "Government and Other Approvals" on pages 126 and 225 , respectively, of this Draft Prospectus.

18. Our manufacturing unit and Registered Officer are currently located in one geographical area. The loss of, or shutdown of or disruption in operations of our offices and unit will adversely affect our business, financial condition and results of operations.

Our manufacturing unit and Registered Officer are located in Rajasthan. Any significant disruption, including social, political or economic factors or natural calamities or civil disruptions, impacting Rajasthan may adversely affect our business operations. Any failure of our systems or any shutdown of any of our manufacturing unit and offices for any reason could result in significant increase of costs and delays in execution of orders. We do not have a diversified base of manufacturing operations, and local disturbances which would have a material adverse effect on our business, and consequently on our operations and financial condition. Further, our offices are subject to operating risks, such as performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and

regulatory restrictions. Any disruption of operations of our offices could result in delayed delivery of our product, which in turn may lead to disputes and legal proceedings with them on account of any losses suffered by them or any interruption of their business operations due to such delay or defect. While our strategic objectives include geographical expansion across India, in the event that we are unable to make available our products in a prompt manner and within the requisite timelines our business, financial condition and prospects may be adversely affected.

19. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically as well as internationally to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

20. *We cannot assure that we may be able to utilize our proposed upgradation of existing manufacturing unit to its full capacity or up to an optimum capacity, and non-utilisation of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition.*

Our Company is engaged in the manufacturing of precision stainless steel cold rolled strips, offering a wide range of thin and ultra-thin variants designed to meet diverse industrial requirements. The company's products are widely used across various sectors including the textile, automotive, chemical industries, as well as in flexible tubes, capillary tubes, clocks, watches, and electrical equipment. We propose to utilise an amount of ₹ 1,398.64 lakhs out of the Net Proceeds towards investment in installation of 1150 mm 4-Hi AGC Reversible Rolling Machine at the existing manufacturing facility. For further details, please see "Objects of the Issue" on page 83.

In the event, we are unable to procure sufficient orders from customers for existing as well as new products or if the products proposed to be offered become obsolete on account of changing requirements of our customers, we may experience a decline in the capacity utilization of our manufacturing unit. The capacity utilization may also be dependent on various factors, including demand for the proposed products, availability of raw materials, shipping cost, our ability to manage its inventory and improving operational efficiency. Underutilization of the proposed production capacities over extended periods or significant under-utilization in the short-term could materially and adversely impact our business, growth prospects and future financial performance. The capacity utilization levels may be dependent on its ability to carry out uninterrupted operations, the availability of raw materials, industry/ market conditions, as well as by the product requirements of, and procurement practice followed by the prospective customers. In the event we faces prolonged disruptions at the manufacturing unit including due to interruptions in the supply of electricity, water or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization, resulting in operational inefficiencies which could have a materially adverse effect on our business and financial condition. We cannot assure that we shall be able to utilize the manufacturing capacity including addition as proposed to its full capacity or up to an optimum capacity, and non-utilisation of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition.

21. *Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds towards (i) Upgradation of existing manufacturing facility by installation of 1150 mm 4-Hi AGC Reversible Rolling Machine; (ii) Repayment/pre-payment, in part, of certain secured and unsecured borrowing availed by our Company; (iii) Funding of Working Capital Requirement of our Company; and (iv) General

corporate purposes. For further details of the proposed objects of the Issue, see “*Objects of the Issue*” beginning on page 83. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of the Shareholders through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the Shareholders in a timely manner, or at all. Any delay or inability in obtaining such approval of the Shareholders may adversely affect our business or operations. Further, our Promoters or controlling shareholders, if applicable, would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI.

Additionally, the requirement on Promoters or controlling shareholders, if applicable, to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that our Promoters or the controlling shareholders of our Company if applicable, will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business, financial conditions, cash flows and results of operations.

22. *Our funding requirements and proposed deployment of the Net Proceeds of the Issue have not been appraised by a bank or a financial institution and if there are any delays or cost overruns, our business, cash flows, financial condition and results of operations may be adversely affected.*

We intend to use the Net Proceeds of the Issue for the purposes described in “*Objects of the Issue*” on page 83. The objects of the Issue and deployment of funds have not been appraised by any external agency or any bank or financial institution or any other independent agency. The proposed utilization of Net Proceeds is based on our current business plan, management estimates, prevailing market conditions and other commercial considerations, which are subject to change and may not be within the control of our management. Based on the competitive nature of our industry, we may have to revise our business plan and/ or management estimates from time to time and consequently our funding requirements may also change. Our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our project and capital expenditure and may have an adverse impact on our business, financial condition, results of operations and cash flows. Our Company, in accordance with the policies established by the Board from time to time, will have flexibility to deploy the Net Proceeds. Further, pending utilization of Net Proceeds towards the Objects of the Issue, our Company will have the flexibility to deploy the Net Proceeds and to deposit the Net Proceeds temporarily in deposits with one or more scheduled commercial banks included in Second Schedule of Reserve Bank of India Act, 1934, as may be approved by our Board. Accordingly, prospective investors will need to rely upon our management’s judgment with respect to the use of Net Proceeds.

23. *We have applied for renewal of our certain statutory / regulatory licenses and quality certificates which are pending for approval. In case of failure on our part to get the same renewed, it may have a material adverse effect on our business, results of operations and financial condition.*

We have applied for renewal of the following certain statutory / regulatory licenses and quality certificates which are pending for approval:

- a) Application dated December 26, 2024, for Change in Registered Detail with Employees’ State Insurance Corporation.
- b) Application dated May 26, 2025, for renewal of License No. CM/L-8400227916 bearing the Indian Standard Mark IS 6911:2017.
- c) Application dated May 26, 2025, for renewal of License No. CM/L-8400228009 bearing the Indian Standard Mark IS 15997:2012.
- d) Application dated May 26, 2025, for renewal of License No. CM/L-8400233313 bearing the Indian Standard Mark IS 5522:2014.

There can be no assurance that the relevant authorities will renew such licenses / registrations, approvals and quality certificates in a timely manner or at all. Failure by our Company to get the renewal of any of the licenses, approvals and registrations, may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled "Government and Other Approvals" beginning on page 225 of this Draft Prospectus.

24. *If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.*

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-compliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled "Government and Other Approvals" beginning on page 225 of this Draft Prospectus.

25. *We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our finished products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.*

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing unit and transportation of our finished products from our unit to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our finished products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long-term agreements with our transporters for any of our manufacturing unit and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

26. *If we are unable to identify customer demand accurately and maintain an optimal level of inventory proportionately, our business, results of operations and financial condition may be adversely affected.*

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in such identification could result in either surplus stock, which we may not be able to sell in a timely manner, or no stock at all, or under stocking, which will affect our ability to meet customer demand. We plan our inventory and estimate our sales based on the forecast, demand and requirements for our products based on past data. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively by readily making our products

available to our customers. Ensuring continuous availability of our products requires prompt turnaround time and a high level of coordination across raw material procurement, manufacturers, suppliers, warehouse management and departmental coordination. While we aim to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. If we over-stock inventory, our capital requirements may increase and we may incur additional financing costs. Any unsold inventory would have to be sold at a discount, leading to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations and financial condition. If we under-stock inventory, our ability to meet customer demand may be adversely affected.

27. *We have significant power requirements for continuous running of our manufacturing unit. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

Our manufacturing unit has significant electricity requirements and any interruption in the supply of power may temporarily disrupt our operations. All our manufacturing unit receive power supply from local power authorities. Since, we have a significant power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing unit and thereby cause an increase in the production cost which we may not be able to pass on to our customers. There are limited number of electricity providers in the areas from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled “Our Business” on page 126 of this Draft Prospectus.

28. *Our Company has availed unsecured loans, which are callable in nature.*

As on March 31, 2025, our Company has outstanding unsecured loans aggregating to ₹ 1687.63 lakhs, which have been extended by our Promoters and other bodies corporates, which are callable in nature and can be recalled at any time. We cannot assure you that our Promoters and other bodies corporates will not demand repayment of the unsecured loans extended to us. In the event, our Promoters and other bodies corporates seek a repayment of any these unsecured loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to carry out the operations or complete our ongoing operations. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “Financial Indebtedness” on page 203 of this Draft Prospectus.

29. *Any disruption to the steady and regular supply of workforce for our operations, including due to strikes, work stoppages or increased wage demands by our workforce or any other kind of disputes with our workforce or our inability to control the composition and cost of our workforce could adversely affect our business, cash flows and results of operations.*

Our business operations are labour intensive, require our management to undertake significant labour interface, and expose us to the risk of industrial action. We employ skilled as well unskilled workforce. We may be subject to industrial unrest, slowdowns, and increased wage costs, which may adversely affect our business, financial conditions, cash flows and results of operations. While we consider our relationship with our employees to be good and there has been no such instance in the three Fiscals, we could experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to perform our business operations. Further, work stoppages due to strikes or other events could result in slowdowns or closures of our operations which could have an adverse effect on our business, cash flows and results of operations. While there has been no instance in the last three Fiscals where we experienced work stoppages due to strikes or labour unrest that resulted in closure of our operations, there is no assurance that we may not experience any such events in the future.

30. *Our industry is competitive and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.*

The stainless-steel industry in India is fragmented and competitive with several regional brands and retailers present in local markets across the country. Our products compete with non-branded products, economy brands and products of other established brands. Any increase in sale of such brands or if preference is given to such brands, it may have an adverse impact on our business and results of operations. Some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and

consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices.

Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition. For further details, please see “*Industry Overview*” on page 114 of this Draft Prospectus.

31. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Directors and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoters and Other Interests and Disclosures*” in the chapter titled — “*Our Promoters and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information*” on pages 151 , 167 , 203 and 174 , respectively of this Draft Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

32. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold [●] % of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company’s best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

33. *Our Company has issued Equity Shares in the last one year at a price which may be lower than the Issue Price.*

We have issued Equity Shares in the preceding one year at a price which may be lower than the Issue Price. The details of the Equity Shares have been provided below:

Date of allotment	Number of equity shares allotted	Face Value	Issue Price	Nature of allotment	Benefit accrued to our Company	Source out of which bonus shares issued
June 11, 2025	95,70,000	10	-	Bonus Shares	NA	Free reserves

We cannot assure you that any issuance of Equity Shares made by our Company post completion of this Issue will be above the Offer Price or the prevailing market price of our Equity Shares. For further details, please see “*Capital Structure*” on page 68 of this Draft Prospectus.

34. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.*

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined through book building mechanism. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "*Capital Structure*" on page 68 of this Draft Prospectus.

35. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

36. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of March 31, 2025, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — "*Restated Financial Information*" at page 174.

While we believe that all our related party transactions have been conducted on an arm's length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

37. *Members of our Promoter Group have extended personal guarantees with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.*

Our Promoter Group, Jai Bhagwan Agarwal, Kavita Agarwal, and Shashank Agrawal, have extended personal guarantees in favour of certain banks / financial institutions with respect to various facilities availed by our Company from them. In the event the guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. If the guarantees is invoked or our manufacturing unit is foreclosed, the ability of our Company to continue its business operations could be adversely affected. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled "*Financial Indebtedness*" on page **Error! Bookmark not defined.** of this Draft Prospectus.

38. *We have written off certain bad debts in the past, and there can be no assurance that similar write-offs will not occur in the future.*

Any significant write-offs may adversely impact our financial condition and profitability. Frequent or large-scale write-offs could also affect our working capital position. These events may indicate weaknesses in our credit assessment or recovery processes. Investors should carefully consider the implications of such write-offs on our business operations.

39. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms

of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 203 of this Draft Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

40. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page 203 of this Draft Prospectus.

41. *Any conflict of interest which may occur between our business and any other similar business activities pursued by our Promoters could have a material adverse effect on our business and results of operations.*

As of the date of this Draft Prospectus, our Promoters are associated with entities which are engaged in business activities similar to our business, thereby causing a conflict of interest between our Company and our Promoters. We have not entered into a non-compete arrangement with him to address such conflicts. We cannot assure you that a conflict will not arise, or that we will be able to suitably resolve any such conflict without an adverse effect on our business or operations.

42. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. As, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 83 of this Draft Prospectus. Further, We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations.

43. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company's future significantly depends upon the experience of our Promoters namely Jai Bhagwan Agarwal, Kavita Agarwal, and Shashank Agrawal, and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 151 of this Draft Prospectus.

44. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, our Company has the following insurance policies in insure its offices, manufacturing facility and assets:

Sr No.	Insurance Company	Description	Premium Amount (Including GST) (₹)	Expiry Date	Sum Assured (₹ in Lakh)
1	National Insurance Company Limited	Vehicle Insurance: Car AUDI, Q3 & 35 Tdi Quattro, Technology (2017-2020)	₹ 19,024/-	November 26, 2025	17.44

There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

45. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 173 of this Draft Prospectus.

46. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

47. We have not independently verified certain data in this Draft Prospectus.

We have not independently verified data from the industry and related data contained in this Draft Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

48. The requirements of being a listed company may strain our resources.

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

49. The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research

publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

50. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of NSE in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of NSE due to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

51. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

52. *The price of the Equity Shares may be highly volatile after the Issue.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

53. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.*

The Equity Shares will be listed on the Emerge Platform of NSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI. However, SEBI pursuant to its circular bearing reference number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 has reduced the time taken for listing of specified securities after the closure of public issue to 3 working days (T+3 days); 'T' being issue closing date. Our Company shall close this Issue in accordance with the timeline provided under the aforementioned circular.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

54. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result

of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

55. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the textile sector;
- adverse media reports about us or the Indian textile sector;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

56. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

57. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of Equity Shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

58. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or

jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

59. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

60. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

61. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Global pandemics or epidemics, or fear of spread of contagious diseases, such as Ebola or Nipah virus disease, coronavirus disease 2019 ("COVID-19"), Middle East respiratory syndrome, severe acute respiratory syndrome, H1N1 flu, H7N9 flu, and avian flu could disrupt our business operations, reduce or restrict our supply of materials and services, incur significant costs to protect our employees and facilities, or result in regional or global economic distress, which may materially and adversely affect our business, financial condition, and results of operations. Actual or threatened war, terrorist activities, political unrest, civil strife, and other geopolitical uncertainty could have a similar adverse effect on our business, financial condition, and results of operations. Any one or more of these events may impede our production and delivery efforts and adversely affect our sales results, which could materially and adversely affect our business, financial condition and results of operations.

Any future global spread of the COVID-19 pandemic may result in global economic distress, and the extent to which it may affect our results of operations will depend on future developments, which are highly uncertain and cannot be predicted. We cannot assure you that the COVID-19 pandemic can be eliminated or contained in the near future, or at all, or a similar outbreak will not occur again. If the COVID-19 pandemic and the resulting disruption to our business were to extend over a prolonged period, it could materially and adversely affect our business, financial condition, and results of operations.

We are also vulnerable to natural disasters, including but not limited to hurricanes, earthquakes, tsunamis, fires and other calamities. We cannot assure you that any backup systems will be adequate to protect us from the effects of such unexpected events. Any of the foregoing events may give rise to interruptions, damage to our property, delays in production, breakdowns, system failures, technology platform failures, or internet failures, which could cause the loss or corruption of data or malfunctions of software or hardware as well as adversely affect our business, financial condition, and results of operations.

62. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in this Draft Prospectus.

While facts and other statistics in the relating to India, the Indian economy, and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such

materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the section titled “*Industry Overview*” beginning on page no. 114 of this Draft Prospectus Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

63. *Changing regulations in India could lead to new compliance requirements that are uncertain.*

The regulatory and policy environment in which we operate is evolving and is subject to change. The Government of India may implement new laws or other regulations and policies that could affect EVs or vehicles in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition, cash flows and results of operations. Furthermore, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Any changes to such laws, including the instances mentioned below, may adversely affect our business, financial condition, results of operations, cash flows and prospects.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019 (“Wages Code”); (b) the Code on Social Security, 2020 (“Social Security Code”); (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 (Collectively, the “Labour Codes”) which consolidate, subsume and replace numerous existing central labour legislations. The Government of India has deferred the effective date of implementation of the respective Labour Codes, and they shall come into force from such dates as may be notified. Different dates may also be appointed for the coming into force of different provisions of the Labour Codes. While the rules for implementation under these codes have not been notified in its entirety, as an immediate consequence, the coming into force of these codes could increase the financial burden on our Company, which may adversely impact our profitability. We are yet to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to the employees which was earlier segregated under different acts and had different applicability and coverage. Furthermore, the Wages Code limits the amounts that may be excluded from being accounted toward employment benefits (such as gratuity and maternity benefits) to a maximum of 50% of the wages payable to employees. The implementation of such laws has the ability to increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

Unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations, financial condition, cash flows and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

Additionally, if we are affected, directly or indirectly, by the application or interpretation of any provision of such laws and regulations or any related proceedings, or are required to bear any costs in order to comply with such provisions or to defend such proceedings, our business and financial performance may be adversely affected.

64. *Terrorist attacks, civil unrest and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition, and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, and other countries and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade the global equity markets as well generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

65. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

66. *Adverse geopolitical conditions such as an increased tension between India and its neighbouring countries, Russia-Ukraine conflict, could adversely affect our business, results of operations and financial condition.*

Adverse geopolitical conditions such as increased tensions between India and its neighbouring countries, resulting in any military conflict in the region could adversely affect our business and operations. Such events may lead to countries including the Government of India imposing restrictions on the import or export of products or components, among others, and affect our ability to procure raw materials required for our business operations. We could also be affected by the introduction of or increase in the levy of import tariffs in India, or changes in trade agreements between countries. For instance, the government of India has imposed additional tariffs in the nature of countervailing duty and anti-dumping duty on a number of items imported from China. Any such measure or reciprocal duties imposed on Indian products by China or other countries may adversely affect our results of operations and financial condition. Further, prolonged Russia-Ukraine conflict that is currently impacting, inter alia, global trade, prices of oil and gas could have an inflationary impact on the Indian economy.

67. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

68. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure ("ASM") and Graded Surveillance Measures ("GSM") by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.*

SEBI and the Stock Exchanges have introduced various pre-emptive surveillance measures in order to enhance market integrity and safeguard the interests of investors, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple, market capitalization etc.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company.

In case of a shortfall in raising requisite capital from the Net Proceeds or an increase in the total estimated cost of the Objects, business considerations may require us to explore a range of options including utilising our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned objects, per the estimated scheduled of deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscal years towards the aforementioned Objects.

Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance

The fund requirements are based on current circumstances of our business and our Company may have to revise its estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations. Consequently, the fund requirements of our Company are subject to revisions in the future at the discretion of the management. In the event of any shortfall of funds for the activities proposed to be financed out of the Net Proceeds as stated above, our Company may re-allocate the Net Proceeds to the activities where such shortfall has arisen, subject to compliance with applicable laws. Further, in case of a shortfall in the Net Proceeds or cost overruns, our management may explore a range of options including utilising our internal accruals or seeking debt financing. For further details see “Risk Factors – Risk Factor 58 - Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders’ approval” on chapter beginning on page no. 27

The fund requirements set out for the aforesaid objects of the Offer are proposed to be met entirely from the Net Proceeds. In view of above, we confirm that, with respect to the Objects, our Company is in compliance with Regulation 230(1)(e) of the SEBI ICDR Regulations and we are not required to make firm arrangements of finance through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised through the Offer and existing identifiable internal accruals. In case of a shortfall in the Net Proceeds or any increase in the actual utilization of funds earmarked for the Objects, our Company may explore a range of options including utilizing our internal accruals.

Key assumptions for working capital requirements

Our Company's estimated working capital requirements on a standalone basis are based on the following key assumptions:

S. No.	Particulars	Assumptions
Current Assets		
1	Inventories	Inventory levels are maintained by our Company depending upon the demand and delivery schedules. We had: <ul style="list-style-type: none"> Raw material inventory turnover cycle of 24, days, 19 days and 56 days in Fiscal 2023, Fiscal 2024 Fiscal 2025, respectively. We are making efforts to improve our inventory days and expect the same to be around 60 days in Fiscal 2026 and 2027. Work in Progress inventory turnover cycle of 7, days, 4 days and 8 days in Fiscal 2023, Fiscal 2024 Fiscal 2025, respectively. We The same to be around 7 days in Fiscal 2026 and 2027. Finish inventory turnover cycle of 7, days, 3 days and 8 days in Fiscal 2023, Fiscal 2024 Fiscal 2025, respectively. We are making efforts to improve our inventory days and expect the same to be around 7 days in Fiscal 2026 and 2027.
1	Trade receivables	Our Company's general credit terms vary across export sales and domestic sales

S. No.	Particulars	Assumptions
		and further from customer to customer. We had debtors holding days of 29 days, 79 days and 134 days in Fiscal 2023, Fiscal 2024 and Fiscal 2025, respectively. The same was 90 days for the for Fiscal 2026 and Fiscal 2027. The increase in debtors' days is expected on account of introduction of new product line with the installation of new 1150 mm 4-Hi AGC Reversible Rolling Machine which will enable the Company to cater additional industry segments. Further, we may have to offer higher credit period for the new product which will lead to higher working capital requirement.
Current Liabilities		
1	Trade payables	Over the past few years, there was an increase in the payment cycle to vendors. This led to an increase in trade payables leading to a lesser working capital requirement. We had creditors payment cycle of 26 days, 50 days and 102 days in Fiscal 2023, Fiscal 2024 and Fiscal 2025, respectively. However, we expect our creditors payments days to be reduced to 55 days for Fiscal 2026 and 2027, resulting in an expansion of the working capital needed. Primarily, quicker settlements enable us to leverage cash discounts from suppliers, enhancing our profitability. Additionally, prompt payments empower us to negotiate more favourable terms and prices, fostering stronger supplier relations and bolstering our bottom line. Timely settlements not only solidify our long-term relationships with suppliers but also ensure the continuity of our supply chain. By shortening our payables cycle, we're not only improving financial stability but also fortifying relationships with suppliers and securing advantageous deals for our Company's growth.

Reason for substantial increase of working capital requirement is mentioned below:

We are in the business of converting HR coils into CR coils. The Company is manufacturing coils in standard sizes and thickness of grade 200, 300 and 400 series from 0.08mm – 2.00mm as required by the producer industries which cater to industry segments through a network of 60 to 70 dealers and traders. Slitting from 5mm and above material can be provided in the hard or soft form as per customers requirement. We are now adding 1150 mm 4-Hi AGC Reversible Rolling Machine from China. With this setup, the Company will become the one of the very few companies in India to possess such advanced equipment, following Jindal Stainless Limited and one other. This strategic move will enable higher production volumes and improved operational margins. Importantly, this advanced rolling machine is rare in the Indian market, positioning the Company in a highly competitive and potentially monopolistic segment. The uniqueness of this machine in the domestic landscape will provide the Company with a distinct technological edge and open up new opportunities in the markets. The installation of this machinery is a key milestone in the Company's strategic roadmap, reflecting its proactive approach to innovation, quality enhancement, and long-term value creation. These will collectively drive our future operations and necessitates additional working capital.

During the period ended March 31, 2025, the total working capital requirement was ₹4,592.76 lakhs. This is estimated to increase to ₹ 5,949.07 lakhs during FY2026 and ₹ 7,438.50 Lakhs in in FY2027. The reasons for increase in future working capital requirements of our company are as under:

- Our Company's business is a working capital intensive and to address the current issue of limited working capital and achieve exponential growth, the Company plans to infuse funds into working capital from the IPO Proceeds. A significant increase in trade receivables is due to our plans to engage with new clients and extend longer credit periods as part of our strategy to build stronger relationships. Since the last financial year, the Company has already achieved substantial increase in its monthly billing due to higher orders from customers. Hence, the Company expects substantial increase in trades receivable in line with expansion in business operations and increase in turnover of the Company in forthcoming financial years. Further, with the installation of new 1150 mm 4-Hi AGC Reversible Rolling Machine, our Company will be able to manufacture Cold Rolled Sheet upto saving blade grade level. It is expected that this will enable us to add new customer and also directly offer our products to the end industry user. All these may require us to offer longer credit period initially to add new customers and build relationship. These will collectively drive our future operations and necessitates additional working capital.
- Our strategic objective is to improve out top line and offer value-added products to our customers, with a continuous growth philosophy and to enter in new geographies. We generally hold higher inventories for supply to our customers as and when demand comes. With the additional of new product line, we will be

required to maintain higher inventory, we require higher working capital.

- The surge in turnover had direct impact on the Company's working capital requirements due to specific changes in the following areas:
 - Outstanding Receivables: The rise in volume of sales, which in turn necessitated an increase in outstanding receivables. As the company offered longer credit period to its customers, funds became locked in pending invoices, resulting in an expansion of the working capital needed.
 - Inventories: Similar to reasons specify for increase in trade receivable, owing to the Company's expectation of higher production, it is expected that substantial amount of inventory of finish product and raw materials will be kept in stock. This strategic approach aligns with our goal of sustaining growth while efficiently managing inventory levels to meet project demands effectively.
 - Payment to Suppliers: Over the past few years, there was an increase in the payment cycle to vendors. This leads to an increase in trade payables leading to a lesser working capital requirement. For example, our Company maintained holding level of trade payable at 102 days during the period ended March 31, 2025. The holding levels are expected to reduce to going down to 55 days in FY2027, resulting in an expansion of the working capital needed. Primarily, quicker settlements enable us to leverage cash discounts from suppliers, enhancing our profitability. Additionally, prompt payments empower us to negotiate more favourable terms and prices, fostering stronger supplier relations and bolstering our bottom line. Timely settlements not only solidify our long-term relationships with suppliers but also ensure the continuity of our supply chain. By shortening our payables cycle, we're not only improving financial stability but also fortifying relationships with suppliers and securing advantageous deals for our company's growth.
- The Company is planning to enter into newer geographies and expand our business. This strategic decision is not just about reaching new markets, it is about solidifying our position in the industry and fostering sustainable growth. By venturing into untapped territories, we aim to unlock fresh opportunities, broaden our customer base, and diversify our revenue streams. This also leads to higher working capital requirements.

Further, the below mentioned future business strategies as mentioned in the chapter "*Our Business – Our Strategies*" on page 126 of the Draft Prospectus would also lead to increase in working capital requirements:

The Company is committed to a strategic growth trajectory aimed at strengthening its market position, enhancing operational efficiency, and maximizing stakeholder value. As part of this vision, the Company has undertaken key initiatives to expand its production capabilities and improve its product offering. In line with this objective, the Company has finalized a deal to import and install an 1150 mm 4-Hi AGC Reversible Rolling Machine from China. An advance payment has already been made toward the procurement of this state-of-the-art machinery. This installation is expected to significantly enhance the Company's capacity utilization, increasing production capacity by 2.5 times compared to the current level. Importantly, this advanced rolling machine in the Indian market will help us positioning the Company in a highly competitive and potentially growing segment. The uniqueness of this machine in the domestic landscape will provide the Company with a distinct technological edge and open up new opportunities in the markets. The installation of this machinery is a key milestone in the Company's strategic roadmap, reflecting its proactive approach to innovation, quality enhancement, and long-term value creation.

As part of its forward-looking strategy, the Company is actively exploring new avenues for growth and diversification over the next three years. One of the key initiatives in this direction involves entering into the value-added product segment through precision rolling of Hot Rolled (HR) stainless steel coils to a thickness of 0.08 mm, which is primarily used in the manufacturing of shaving blades. This move will not only enable the Company to cater to a high-demand niche market but also position it among a limited number of domestic players capable of producing stainless steel at such precision and quality. The entry into this specialized product segment is expected to significantly enhance sales volume, broaden the customer base, and drive an increase in overall production capacity. Moreover, it will boost capacity utilization to approximately 90%, up from the current level of 50–60%, reflecting a substantial improvement in operational efficiency. This initiative aligns with the Company's objective of continuous innovation, market differentiation, and sustainable revenue growth.

Our finished products can be used in the different through its dealer network served many industries.

Strengthening our foothold in our existing markets and expanding our customer base

A majority of our products are primarily sold domestically through dealers or traders' networks and our products indirectly caters to the raw material requirements of a number of other industries/units such as Auto Industry, Industrial Segment, Textile Machineries, Electronic Industry, Electrical Industry, Consumer Durables etc.

Currently our main focus area is to cater these industries directly to improve the margins and also to expand the customer portfolio of our company. Now, the company has started to build its own marketing team to reach these above-mentioned industries and also to enter into the new industries and grow the revenue as much as possible.

Focus on Exports

Although there was a recent decline in exports due to capacity limitations and increased competition in international markets, the company is actively repositioning itself for global growth. The purchase of a new, advanced manufacturing machine from China marks a pivotal step in this direction. This investment is expected to significantly enhance production efficiency, improve product quality, and align output with global standards—key requirements for competing in export markets.

With the upgraded infrastructure, the company is now better equipped to fulfill larger and more consistent export orders. Backed by a renewed focus on market research, regulatory compliance, optimized logistics, and strategic international partnerships, the company aims to reverse the downturn and strengthen its presence in key global markets. This focused export strategy is expected to drive recovery and deliver sustainable long-term growth through international sales.

Continue to focus on increasing our market share and expand our portfolio of products

We intend to continue to focus on increasing our capacity and performance in order to increase our market share by leveraging on our strengths and providing total customer satisfaction. We are also focusing on introducing additional specified and specialised applications of our products to cater to niche segments and directly catering to industry which are using our products as raw material. The changing scenario in the logistics arena has brought up the necessity to introduce modern, high efficiency products. Responding to this need we are exploring options of introducing new types of cold rolled products.

SECTION VI – ABOUT THE COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMY

The global economy is holding steady, although the degree of grip varies widely across countries. Global GDP growth in the third quarter of 2024 was 0.1 percentage point below that predicted in the October 2024 WEO, after disappointing data releases in some Asian and European economies. Growth in China, at 4.7 percent in year-over-year terms, was below expectations. Faster-than-expected net export growth only partly offset a faster-than-expected slowdown in consumption amid delayed stabilization in the property market and persistently low consumer confidence. Growth in India also slowed more than expected, led by a sharper-than-expected deceleration in industrial activity. Growth continued to be subdued in the euro area (with Germany's performance lagging that of other euro area countries), largely reflecting continued weakness in manufacturing and goods exports even as consumption picked up in line with the recovery in real incomes. In Japan, output contracted mildly owing to temporary supply disruptions. By contrast, momentum in the United States remained robust, with the economy expanding at a rate of 2.7 percent in year-over-year terms in the third quarter, powered by strong consumption.

Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labor market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions (see box below). Equities in advanced economies have rallied on expectations of more business friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries (see box below). Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

The Outlook

Energy commodity prices are expected to decline by 2.6 percent in 2025, more than assumed in October. This reflects a decline in oil prices driven by weak Chinese demand and strong supply from countries outside of OPEC+ (Organization of the Petroleum Exporting Countries plus selected non-member countries, including Russia), partly offset by increases in gas prices as a result of colder-than-expected weather and supply disruptions, including the ongoing conflict in the Middle East and outages in gas fields. Nonfuel commodity prices are expected to increase by 2.5 percent in 2025, on account of upward revisions to food and beverage prices relative to the October 2024 WEO, driven by bad weather affecting large producers. Monetary policy rates of major central banks are expected to continue to decline, though at different paces, reflecting variations in growth and inflation outlooks. The fiscal policy stance is expected to tighten during 2025–26 in advanced economies including the United States and, to a lesser extent, in emerging market and developing economies.

Global growth is expected to remain stable, albeit lackluster. At 3.3 percent in both 2025 and 2026, the forecasts for growth are below the historical (2000–19) average of 3.7 percent and broadly unchanged from October. The overall picture, however, hides divergent paths across economies and a precarious global growth profile (see the box below). Among advanced economies, growth forecast revisions go in different directions. In the United States, underlying demand remains robust, reflecting strong wealth effects, a less restrictive monetary policy stance, and supportive financial conditions. Growth is projected to be at 2.7 percent in 2025. This is 0.5 percentage point higher than the October forecast, in part reflecting carryover from 2024 as well as robust labor markets and accelerating investment, among other signs of strength. Growth is expected to taper to potential in 2026.

Figure 2. Evolution of 2025 Growth Forecasts (Percent)

Source: IMF staff calculations.

Note: The x-axis shows the months the *World Economic Outlook* is published. AEs = advanced economies; EMDEs = emerging market and developing economies.

In the euro area, growth is expected to pick up but at a more gradual pace than anticipated in October, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened political and policy uncertainty explain a downward revision of 0.2

percentage point to 1.0 percent in 2025. In 2026, growth is set to rise to 1.4 percent, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat.

In other advanced economies, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds—including the sharp uptick in trade policy uncertainty—are expected to keep investment subdued.

OVERVIEW OF THE INDIAN ECONOMY

India is poised to lead the global economy once again, with the International Monetary Fund (IMF) projecting it to remain the fastest growing major economy over the next two years. According to the April 2025 edition of the IMF's World Economic Outlook, India's economy is expected to grow by 6.2 per cent in 2025 and 6.3 per cent in 2026, maintaining a solid lead over global and regional peers.

The April 2025 edition of the WEO shows a downward revision in the 2025 forecast compared to the January 2025 update, reflecting the impact of heightened global trade tensions and growing uncertainty. Despite this slight moderation, the overall outlook remains strong. This consistency signals not only the strength of India's macroeconomic fundamentals but also its capacity to sustain momentum in a complex international environment. As the IMF reaffirms India's economic resilience, the country's role as a key driver of global growth continues to gain prominence.

Source: India: Fastest-Growing Major Economy, Ministry of Finance, Posted On: 23 APR 2025 4:40PM by PIB Delhi

The recent GDP growth figures of 5.4% year over year¹ for the second quarter of fiscal year 2024 to 2025 probably caught markets off guard (it was significantly below the Reserve Bank of India's projection of 6.8%). Slower growth in the first half of the fiscal (6%) led the RBI to bring down the annual projection to 6.6% (down from an earlier projection of 7%). However, it's essential not to let the headline numbers overshadow the nuanced story beneath: GDP is just one lens to evaluate economic health, and this quarter reveals resilience in certain pockets that are worth noting.

Rural consumption has remained robust, supported by strong agricultural performance, while the services sector continues to be a key driver of growth. Manufacturing exports, particularly in high-value-added components (such as electronics, semiconductors, and pharmaceuticals), have displayed strength, underscoring India's growing role in global value chains. We believe the slow growth in the secondary sector³ is temporary (due to disruptions caused by monsoons).

Deloitte has revised its annual GDP growth projection for India to between 6.5% and 6.8% in this fiscal year, and between 6.7% and 7.3% in the following one. A tempered global growth outlook and a delayed synchronized recovery in the industrial economies amid changing trade and policy regulations—compared to what was previously expected—will likely weigh on India's exports and outlook for the next fiscal year. India will have to adapt to the evolving global landscape and harness its domestic strengths to drive sustainable growth.

Decoding the slowdown in the second quarter

On the expenditure side, the slowdown in investments and exports were key factors weighing on the economy. Gross fixed capital formation (GFCF), a key driver of economic growth, slowed down to 5.4%. This was partly due to slower government capex utilization, which was at 37.3% in the first half of this year, lower than last year's 49%.

Geopolitical uncertainties and disruptions in global supply chains, particularly in the Red Sea region, continued to weigh on exports. Petroleum product exports experienced a consistent decline across all three months of the quarter, averaging an approximate 30% contraction. As a result, total export growth slowed to 2.8%. At the same time, imports were higher due to a rise in oil and gold imports.

On the production side, gross value added grew by 5.6% in the second quarter, down from 6.8% in the previous one, primarily due to poor performance in the secondary sector. The slowdown in the industrial sector was somewhat expected as the index of industrial production showed signs of slowing across multiple sectors,

particularly in mining and electricity. Mining contracted by 0.1%, while electricity and other utilities grew by just 3.3% (a sharp decline from the previous quarter's 10.4%). The construction sector grew 7.7%—its lowest since the last quarter of fiscal 2021 to 2022. Growth in manufacturing was modest, at 2.2% (down from 7%).

We believe these sectoral declines are temporary due to monsoon-driven disruptions (8% above-normal rainfall)⁴ and restrictive spending during elections. What is concerning is we also suspect the possibility of higher dumping from neighboring countries. Imports of goods such as plastics, organic chemicals, iron and steel products, machinery, and electronic components have seen a sharp jump in recent months and pose a significant threat in the months ahead amid restrictive trade regulations in industrialized nations.

Amid this growth slowdown, there were a few emerging trends that pointed to inert resilience.

- **Robust rural consumption:** Agricultural growth hit a five-quarter high of 3.5%, aided by a strong monsoon season. Indicators like rising sales of fast-moving consumer goods and declining numbers of jobs demanded through the Mahatma Gandhi National Rural Employment Guarantee Act (more commonly, MGNREGA) confirm strength in rural demand. With healthy kharif⁵ harvests and improved rabi sowing, rural consumption is expected to remain strong, further boosted by festive season spending.⁶
- **Strong services sector growth:** Services grew by 7.2%, driven by public administration and defense (9.1%) and finance, insurance, and real estate (7.2%). Services exports surged 21.3%. Between April and October 2024, total services exports stood at US\$216 billion, compared to US\$192 billion in 2023. This growth is crucial given the sector's significant contribution to India's GDP and employment, specifically for the urban middle-income population.
- **High-value manufacturing exports:** Exports of electronics, engineering goods, and chemicals have grown significantly, now comprising 31% of total merchandise exports. Given that micro, small, and medium enterprises are significant contributors to manufacturing supply chains and exports, rising performance of these enterprises points to healthy growth in this export segment.
- **Controlled fiscal deficit:** The fiscal deficit stood at 4.4% of GDP in the second quarter of this fiscal year, accounting for 29.4% of the budget estimate, and standing 10% lower than last year. This gives government some room to ramp up spending to boost demand. With lower capital expenditure in the first half of this fiscal year, the government is poised to ramp up spending in the coming half, supporting demand and crowding in private investments. A significant uptick in government spending is expected in the second half of this fiscal year to meet budgetary targets, which may provide additional support to the economy and boost investment by crowding in private investments.

India's near-term outlook

We now expect India to grow between 6.5% and 6.8% in fiscal year 2024 to 2025, in our baseline scenario. Although admittedly lower than previously estimated, because of a slower first half of the year, we expect strong domestic demand in the second half, driven by a significant uptick in government spending).

This will be followed by growth between 6.7% and 7.3% in fiscal year 2025 to 2026, with significant downside risks (hence a wider range; figure 1). India's growth projections in the subsequent year will likely be tied to broader global trends, including rising geopolitical uncertainties and a delayed synchronous recovery in the West than anticipated. Disruptions to global trade and supply chain due to intensifying geopolitical uncertainties will also affect demand for exports.

India's Growth in Global Context

India is projected to remain the fastest-growing large economy for 2025 and 2026, reaffirming its dominance in the global economic landscape. The country's economy is expected to expand by 6.2 per cent in 2025 and 6.3 per cent in 2026, outpacing many of its global counterparts. In contrast, the IMF projects global economic growth to be much lower, at 2.8 per cent in 2025 and 3.0 per cent in 2026, highlighting India's exceptional outperformance.

*GDP growth rates for India are on a fiscal year (FY) basis, 2025 refers to 2025/26

The IMF has also revised its growth estimates for other major global economies. China's GDP growth forecast for 2025 has been downgraded to 4.0 per cent, down from 4.6 per cent in the January 2025 edition of the World Economic Outlook. Similarly, the United States is expected to see a slowdown, with its growth revised downward by 90 basis points to 1.8 per cent. Despite these revisions, India's robust growth trajectory continues to set it apart on the global stage.

STEEL INDUSTRY OVERVIEW

Iron & Steel Industry in India

One of the primary forces behind industrialization has been the use of metals. Steel has traditionally occupied a top spot among metals. Steel production and consumption are frequently seen as measures of a country's economic development because it is both a raw material and an intermediary product. Therefore, it would not be an exaggeration to argue that the steel sector has always been at the forefront of industrial progress and that it is the foundation of any economy. The Indian steel industry is classified into three categories - major producers, main producers, and secondary producers.

India is the world's second-largest producer of crude steel, with an output of 125.32 MT of crude steel and finished steel production of 121.29 MT in FY23.

India's domestic steel demand is estimated to grow by 9-10% in FY25 as per ICRA.

India's steel production is estimated to grow 4-7% to 123-127 MT in FY24.

The growth in the Indian steel sector has been driven by the domestic availability of raw materials such as iron ore and cost-effective labour.

Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is modern, with state-of-the-art steel mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels. According to a Deloitte report the demand for steel in India is projected to grow significantly over the next decade, with annual growth rates expected to range from 5% to 7.3%.

Market Size

In the past 10–12 years, India's steel sector has expanded significantly. Production has increased by 75% since 2008, while domestic steel demand has increased by almost 80%. The capacity for producing steel has grown concurrently, and the rise has been largely organic.

In April–October 2024, crude steel production in India stood at 84.94 MT. In April–October 2024, finished steel production stood at 82.65 MT. In FY25 (April–October), the consumption of finished steel stood at 85.71 MT. In April–September 2024 exports of finished steel stood at 2.32 metric tonnes (MT), while imports stood at 4.70 MT.

In FY23, the production of crude steel and finished steel stood at 125.32 MT and 121.29 MT, respectively. In FY24, the production of crude steel and finished steel stood at 143.6 MT and 138.5 MT, respectively. In FY23, crude and finished steel production stood at 125.32 MT and 121.29 MT, respectively. In July 2023, crude steel production in India stood at 11.52 MT.

In FY24, the consumption of finished steel stood at 135.90 MT. The per-capita consumption of steel stood at 86.7 kgs in FY23.

In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. The consumption of finished steel stood at 105.751 MT in FY22. In FY23, the consumption of finished steel stood at 119.17 MT.

Source: Ministry of Steel, *April–December 2024

In April–July 2022, the production of crude steel and finished steel stood at 40.95 MT and 38.55 MT, respectively.

The annual production of steel is anticipated to exceed 300 million tonnes by 2030–31. By 2030–31, crude steel production is projected to reach 255 million tonnes at 85% capacity utilisation achieving 230 million tonnes of finished steel production, assuming a 10% yield loss or a 90% conversion ratio for the conversion of raw steel to finished steel. With net exports of 24 million tonnes, consumption is expected to reach 206 million tonnes by the years 2030–1931. As a result, it is anticipated that per-person steel consumption will grow to 160 kg.

Road Ahead

The steel industry has emerged as a major focus area given the dependence of a diverse range of sectors on its output as India works to become a manufacturing powerhouse through policy initiatives like Make in India. With the industry accounting for about 2% of the nation's GDP, India ranks as the world's second-largest producer of steel and is poised to overtake China as the world's second-largest consumer of steel. Both the industry and the nation's export manufacturing capacity have the potential to help India regain its favourable steel trade balance.

The National Steel Policy, 2017 envisage 300 million tonnes of production capacity by 2030-31. The per capita consumption of steel has increased from 57.6 kgs to 74.1 kgs during the last five years. The government has a fixed objective of increasing rural consumption of steel from the current 19.6 kg/per capita to 38 kg/per capita by 2030-31.

Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

STAINLESS STEEL SHEET OVERVIEW

A stainless steel sheet is a thin, flat piece of steel and is one of the fundamental forms of stainless steel used for metalworking. It can be cut and bent into various forms including strips, plates, and sheets of various shapes, thicknesses, and grades. These sheets are used in manufacturing various machinery, equipment, industrial components, irrigation pipes, greenhouse equipment, and other machines where corrosion poses a significant risk.

They are also used in white goods because they are resistant to corrosion, can be easily fabricated, offer good mechanical properties over a wide range of temperatures, and can achieve diverse aesthetic finishes.

Technological advancements in manufacturing stainless steel and its related products is anticipated to drive the stainless steel sheet market growth during the forecast period. For instance, plasma-cutting technology is ideal for improving the applications of stainless steel. Greater efficiency coupled with an extensive range of protection gases and cutting gases enable this method to increase the cutting speed and obtain much better finishes. This technology also cuts thicknesses that can be difficult for laser or shear cutters, provides higher speed than that of a band saw or water jet, and can cut into a variety of thicknesses. The development and adoption of such technologies are a critical trend in the market.

Moreover, the current global megatrends including urbanization, rising mobility, population, climate change, and economic development are driving the market growth. Rising CO₂ emissions across the world have prompted manufacturers to develop and implement sustainability goals. They are also developing durable and reusable products to achieve these goals. For instance, in July 2021, Técnicas Reunidas and Acerinox announced that they are working on decarbonization by using Acerinox Europa's facilities as a pilot plant.

Driving Factors

Rising Demand from General Manufacturing & Consumer Goods Industry to Drive Market Growth - The most common applications of such sheets include consumer goods, household items, and fixtures. The high corrosion resistance property of stainless steel makes it a top choice for food, textile, manufacturing, chemical, construction, transportation, and aerospace industries. This alloy is majorly used in manufacturing sinks, coils in vaporizers, machinery parts, automobiles, screws, water filtration devices, food processing equipment, rockets, airplanes, chemical containers, dyeing equipment, heat exchangers, and other machines. In marine applications, 304 stainless steel is also used to make screws, bolts, nuts, and other fasteners. The various beneficial properties and versatility offered by stainless steel allow it to be used for a broad range of manufacturing applications. Due to its resistance to intergranular corrosion, which is a byproduct of welding or stress relieving process, it is extensively used for products that cannot use steel or other alloys.

Restraining Factors

Availability of Substitute Products to Hamper Market Growth - The availability of internal and external substitute products, such as galvanized steel, engineered plastics, and aluminium will restrain the adoption of stainless steel sheets. Recently, the demand for aluminum has grown rapidly in the automotive and aerospace industries owing to its ultra-lightweight, cost-effective, and thermal conductivity characteristics. In addition, increasing preference for aluminum beverage cans can prompt manufacturers to opt for this metal due to its lightweight and malleable properties, making it a vital substitute.

Hence, the increasing availability of substitutes will likely reduce the product adoption in various applications, such as consumer goods, engineering, electronics, and automotive. This factor is anticipated to restrain the market growth.

Manufacturing to be Fastest-growing Segment owing to Product Preference from Various Applications

In terms of application, the market is segmented into construction, manufacturing, automotive, consumer goods, and others. In the manufacturing industry, these sheets are used for various applications, such as ship containers, exhaust systems, pipelines, and cable trays. The increasing demand for these products from the oil & gas industry owing to their favorable properties, such as high tensile strength, resistance to corrosion, high temperature tolerance, and compatibility with a range of chemicals is resulting in the segment's robust growth. They are utilized in modern construction projects and techniques due to their high tensile strength and resistance to weathering & corrosion. They are primarily employed in beams, columns, general architectural structures, interior countertops, cladding, backsplashes, and railing. Automotive manufacturers use metal sheets on a large scale in automotive structures and parts due to their easy processing and characteristics, such as malleability, high tensile strength, and corrosion resistance.

OUR STRATEGIES

The Company is committed to a strategic growth trajectory aimed at strengthening its market position, enhancing operational efficiency, and maximizing stakeholder value. As part of this vision, the Company has undertaken key initiatives to expand its production capabilities and improve its product offering. In line with this objective, the Company has finalized a deal to import and install an 1150 mm 4-Hi AGC Reversible Rolling Machine from China. An advance payment has already been made toward the procurement of this state-of-the-art machinery. This installation is expected to significantly enhance the Company's capacity utilization, increasing production capacity by 2.5 times compared to the current level. With this setup, the Company will become the third entity in India to possess such advanced equipment, following Jindal Stainless Limited and one other. This strategic move will enable higher production volumes and improved operational margins. Importantly, this advanced rolling machine is rare in the Indian market, positioning the Company in a highly competitive and potentially monopolistic segment. The uniqueness of this machine in the domestic landscape will provide the Company with a distinct technological edge and open up new opportunities in the markets. The installation of this machinery is a key milestone in the Company's strategic roadmap, reflecting its proactive approach to innovation, quality enhancement, and long-term value creation.

As part of its forward-looking strategy, the Company is actively exploring new avenues for growth and diversification over the next three years. One of the key initiatives in this direction involves entering into the value-added product segment through precision rolling of Hot Rolled (HR) stainless steel coils to a thickness of 0.08 mm, which is primarily used in the manufacturing of shaving blades. This move will not only enable the Company to cater to a high-demand niche market but also position it among a limited number of domestic players capable of producing stainless steel at such precision and quality. The entry into this specialized product segment

is expected to significantly enhance sales volume, broaden the customer base, and drive an increase in overall production capacity. Moreover, it will boost capacity utilization to approximately 90%, up from the current level of 50–60%, reflecting a substantial improvement in operational efficiency. This initiative aligns with the Company's objective of continuous innovation, market differentiation, and sustainable revenue growth.

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications
- II. Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of applications with common DP ID/ beneficiary ID, are manually checked to eliminate possibility of data entry error to determine if they are multiple applications.
- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of "know your client" norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.
